

**SPECIAL ISSUE ON THE 11TH INTERNATIONAL MULTI-CONFERENCE ON ENGINEERING  
AND TECHNOLOGY INNOVATION 2022 (IMETI2022)**

**PREFACE**

This Special Issue presents eight papers (Part 1) that were selected from the proceedings of the 11th International Multi-Conference on Engineering and Technology Innovation (IMETI 2022), which was held from November 28 to December 01, 2022, in Kaohsiung, Taiwan. The articles in this Special Issue highlight the latest findings and innovative applications of sensors, focusing on fundamental studies, industrial practices, and engineering innovations by applying sensor technologies. All of the articles went through a rigorous peer review by at least two reviewers. Acceptance into this Special Issue was based on the reviewers' recommendation, mandatory revisions, and final examination by the Guest Editor. This Special Issue is expected to stimulate researchers to explore sensors and their related technologies.

It is my great honor and pleasure to edit this Special Issue of Sensors and Materials. Also, I would like to thank all the authors who have contributed their original works to this issue. Moreover, I would like to express my deepest appreciation to the reviewers for taking the time to comment on the articles. Lastly, I would like to extend my gratitude to the Editor-in-Chief/ Professor Makoto Ishida and Ms. Naoko Makino of the Editorial Department of MYU K.K. for their kind and professional support to the publication of this Special Issue.

Prof. Wen-Hsiang Hsieh
