

## *Sensors and Materials*

### **Special Issue on Food-Sensing Technologies and Applications**

#### **Call for Papers**

Humans are able to perceive food taste, savor, and texture. These perceptions are essential for our health and enjoyment of food. On the other hand, they are also important factors in food development and production that determine quality and sales. A wide range of areas including product development, production processes, quality control, and safety improvement require food measurement technologies and characterization methods. This special issue will focus on new measurement technologies and novel methods for food evaluation and characterization.

#### **Scope:**

- Sensors for food taste, savor, and texture measurements
- Sensing technologies applied in food development and production
- Food characterization methods
- Technologies related to food estimation
- Technologies and chemical analyses to evaluate palatability and so on.

**Submission due date:** February 28, 2019

**Publication date (planned):** Second half of 2019 – First half of 2020

**Journal website:** <http://myukk.org/>

**Guest Editor:** Hiroyuki Nakamoto (Kobe University)

**Submit to:** Online Manuscript Submission System (<https://myukk-org.ssl-xserver.jp/form/>)

#### **(Attention)**

As stated in Instructions to Authors in the Guidelines, the author(s) will be obliged to pay the publication fee upon acceptance of the manuscript for publication (for example, JPY 95040 for 10 pages in *Sensors and Materials* format). If the quality of the English of your manuscript does not satisfy the journal standards, the authors should bear the proofreading fee (JPY 10000), which will be charged with the publication fee.

If you have any questions, please feel free to contact the editorial staff at the address below.
