

Call for Journal Papers

"Sensors and Materials" Journal

<https://myukk.org/SM2017/index.php?theme=about>

Special Issue on Software, Algorithms, and Applications Using Sensors and Networks

Sensing technologies have become important in many fields as seen in the trend of cyber physical system (CPS), machine-to-machine (M2M) systems, and the Internet of Things (IoT). In this special issue, applications and software systems using sensors and sensor-oriented networks are highlighted instead of sensors themselves. It is also important to be noted that analyzing the obtained sensor data leads to extension of sensor applications that have been not explored.

The papers in the above scope are solicited in this special issue. The submitted papers are peer-reviewed to ensure high-quality publications.

Guest Editor: Yoshito Tobe, Aoyama Gakuin University

Submission Guideline:

<https://myukk.org/SM2017/permanent/Guidelines2018EN.pdf>

Important Dates

Submission Deadline: August 31, 2019.

Notification: October 31, 2019.

Publication: Spring, 2020.

About Sensors and Materials

Sensors and Materials is designed to provide a forum for people working in the multidisciplinary fields of sensing technology, and publishes contributions describing original work in the experimental and theoretical fields, aimed at understanding sensing technology, related materials, associated phenomena, and applied systems. Expository review papers and short notes are also acceptable.
